Message from the Guest Editors

This Special Issue of the *International Journal of Environmental Research and Public Health* (IJERPH) focuses on the broader determinants of health in the context of a severely racialized pandemic. We welcome papers focused on the social and structural determinants of COVID-19 in migrants and ethnic minorities, with a particular emphasis on the racial, gender, political, and legislative determinants of health. We are particularly interested in papers that employ transdisciplinary, participatory, and co-production research approaches to meaningfully involve migrants and ethnic minorities in the response to COVID-19, in its broadest sense. This includes a wide range of topics including, but not limited to, occupational determinants of health, access and uptake of vaccines, participation of ethnic minorities in clinical trials, stigma and discrimination, the built environment, living conditions, health care entitlements, and any other broader determinant of health; as well as approaches and tools to meaningfully engage migrants and ethnic minorities in action-oriented research.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, GEOBASE, Embase, CAPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q1 (*Public, Environmental & Occupational Health*) / CiteScore - Q2 (*Public Health, Environmental and Occupational Health*)
